August 10, 2009

Oscar Harper  
Vice President of Nuclear Development and Resource Planning  
Georgia Power Company  
241 Ralph McGill Blvd. Bin # 10210  
Atlanta, GA 30308

As I am sure you are aware, at the August 4, 2009 Administrative session in Docket # 16573, the RNR tariff I was critical of the efforts of all parties in the marketing of renewable products.

The interests of the solar constructors were clearly met with the Commission's decision. The need to advance further the sale of solar power generated is vital to the success of this interaction.

I am asking that at the committee meetings on September 10, 2009 the company make a report of current marketing efforts of renewable products. Further, I would like for the Commission to hear of the companies plans to enhance its marketing efforts in this regard. The plan should include, but not limited to, the green lobby groups that spoke in favor of enhanced solar production.

Thank you for your prompt attention to this matter. Please let me know if you require anything further.

Sincerely,

Stan Wise
